Sat, 05/21/2011

Because of unfavorable (forecast) arrival weather at Omaha, the ER-2 mission to fly the Land Surface Mission starting at 19Z today has been SCRUBBED. Hail and strong cross winds are in the forecast between 22 and 0030Z, within the ER-2 arrival window.

We will have our telecom at 9 AM CDT on Sunday 22 May to plan for Monday operations. As a reminder, aircraft are hard down on Sunday, 22 May.
